

SK-10B HAND CAPPER

We are proud to introduce our versatile, reliable and affordable **SK-10B Hand Capping Unit**. This unit will handle a wide variety of caps, ranging from 2mm through 110mm. The 115v portable drive unit is equipped with variable torque adjustments and quick no tool changeover of shell and insert. This drive unit comes with a selection switch providing off, forward or reverse direction. The reverse selection will allow the removal of cap from container.

Standard pricing includes tool balancer with adjustable tension setting, electric tool support, bench clamp and drive unit with a standard #40 shell complete with insert suitable for a capping range of 25mm through 40mm. Contact sales for pricing on optional shells and inserts.

The **SK-10 Drive Unit** can be purchased as a separate unit that excludes the tool balancer, electric tool support and bench clamp.

The Surekap SK-10B combination or SK-10 represents a high quality low cost hand capping unit.
