

S-7 Dual-Lane Weigh Filler

- Two lanes for twice the speed
- Self-adjusting controller
- Reads out to 1 gram or .001 lb
- Controller range up to 10 lbs.
- Supply hopper 5.1 cu. ft.
- Powder-coated chassis. Stainless steel optional
- Footprint 7.5 sq ft, 68" high
- 120V 60Hz (wall outlet) 240V 50Hz option available
- Handles any dry bulk from powders to large parts
- Compatible with all bags, rigid containers and bagging machines
- Automatic tare adjustment
- Self adjusting bulk & dribble speed control
- 600-1200 fills/hour

Information:

The model S-7 two lane net weigher share many of the same basic characteristics of the S-4. A very accurate and easy to use **Logical Controller II** allows for three different modes of operation. In simultaneous dump the machine fills both weigh hoppers at the same time, allowing for twice as much product flow than our S-4. In individual dump the machine dumps whichever weigh hopper is at weight. This gives twice the speed of our S-4 machine. Finally the model S-7 can mix products. The **Logical Controller II** can be set to weigh two completely different products at different weights to easily mix products into a container.

Specifications:

- Overall height: 5'8" (68"), occupies only 30"x34" of floor space
- Hopper size: 36" x 24" (5.1 cu. ft. product capacity)
- Scale total weight 225 lbs.
- Standard funnel size: 2.5" x 2.5"
- Power requirements: 4 amps, 120 volts 60Hz AC
- Air Requirements: <1 CFM air supply at 30 psi
- One year limited Warranty

Price:

- \$12,000 standard S-7, F.O.B. Charlotte, VT 05445
- Options:
 - Fill spouts @ \$150.00
 - Divided supply hopper @ \$150.00
