

The ELIMINATOR™ named for what it does best...

The inherent advantages of stretch film come together with the Highlight Eliminator™ to provide a truly innovative unitizing system.

ELIMINATES Costs

Eliminates the cost and additional inventory of master cartons, strapping, shrink, and costly motorized systems. That's how it's earned its name — Eliminator.

ELIMINATES Obsolescence

That's true of all noteworthy tools that stand the test of time. Obsolescence is eliminated as your packaging requirements change. The Eliminator is there to meet those changing needs.

Engineered for packaging flexibility. Practical and easy to operate, the standard design of the Highlight Eliminator stretch bundles packages up to 24 x 24 x 24 inches and weighing up to 70 pounds.

Highlight designed the Eliminator to grow with your changing packaging requirements. Variations developed for your specific applications, such as increased package capacity, cylindrical or odd-shaped products, are easily incorporated.

Many options are available such as the custom cradle for bundling cylindrical products (as shown)

Stretch Set™, for full range film stretch

Traversing handle with Dedicated Bundler accommodates all standard handwrap and machine roll sizes

A Constant Highlight Feature — Versatility

Versatility is achieved with the selective film placement capabilities of the traversing handle. The traversing handle spiral wraps a range of 30 inches. Reinforcing and center wraps need only be applied where you want them.

Adjustable zinc-plated support forks place your product at the center of the orbital rotation for product balance and handling ease.

Use Limited Only by Imagination

Internal packaging, combining multiple packages for shipment and environmental packaging are a few of the many ways you will use the Eliminator.

ELIMINATOR Exclusives

"Stretch Set"™, Highlights film saving system is a Highlight standard. "Stretch Set" allows you to control film stretch while providing uniform, repeatable wrapping results. Results that mean increased package strength and lower costs.

The Eliminator accepts all standard handwrap and machine films. Your film choices are not limited to costly re-rolled films on non-standard core sizes.

Comfortable foam grip handle

Cam locks for easy loading and unloading of product

Adjustable height arms for vertical and horizontal package centering

Boxes shown are ghosted, so entire unit could be shown loaded.

Portable base optional

Bolts to the floor for stable operation

Models EL-1000, EL-1020

The ELIMINATOR™ Wrap-up

1. Apply secure center wrap. It is not necessary to cover package completely in most applications.

2. Apply complete wrap for total package protection.

3. Spooled products are easily accommodated with the Eliminator Spool option.

4. Overwrap ends of cylindrical products for total encapsulation.

Eliminator Optional Base

Eliminator portability is achieved through optional support legs, Option SL-5000.

ELIMINATOR USES

Warehouses
Auto parts, manufacturers/wholesalers
Electrical motors
Wholesale distributors
UPS shippers
Canned goods
Manufacturers of products wound on rolls or spools
Publishers
Book Binders
Firewood
Metal tubing
Printing

THE HIGHLIGHT HANDWRAPPER

Common sense design makes it clear that it's simply the best.

THE FANTOM FULL WEB

Feature for feature the best portable full web on the market, and only the Phantom offers a multiple mode design as standard equipment.
