

PREDATOR PLATINUM

The Predator® Platinum improves productivity by wrapping loads automatically with a simple pull of the lanyard cord, eliminating the need to have the operator attach the film at the beginning or cut and wipe the film to the load at the end of the wrap cycle. Loads can be wrapped up to 50% faster. The Predator® Platinum is a true fully automatic system with built-in features for increased productivity that are not available on other simpler automatics.

NEW! Larger 65" diameter turntable with forklift portability front and rear.

NEW! Automatic film clamp/cut and wipe down system for increased productivity.

Standard wrap height of 80 inches.

NEW! Control Panel with PLC and touch screen for high performance and reliability.

NEW! Side mounted carriage with Fast Film Feed for easy and quick film threading.

EASY TO USE CONTROLS

Predator Platinum

E-STOP

POWER

The Predator® PLATINUM state-of-the-art controls include:

- Touch screen for easy machine setup and help screens
- Start
- Reset
- Stop
- Adjustable Film Force
- Adjustable Carriage Speed
- Adjustable Turntable Speed
- Emergency Stop
- Integrated Power On/Off Switch
- Lanyard Start/Stop Pull Cord

The Predator® PLATINUM is the premium performance platform automatic stretch wrapper!

NEW! Control Panel swivels 360° for full viewing from virtually any angle!

NEW! Side mounted carriage with Fast Film Feed for easy and quick film threading.

NEW! Select Stretch allows you to quickly change your pre-stretch level from 200% to 250% with the press of a button.

NEW! At the end of the cycle the film jaws grip the film and the hot wire instantly pulses to cut the film. The whale tail brushes the film on the load for the best film wipe down in the industry.

System Specifications

Specifications subject to change without notice.
